SUMMARY

Computer Science Engineering student (graduating 2027, CGPA 8.77/10) with hands-on experience building AI/ML-integrated, full-stack applications — recommendation engines, predictive models, and Retrieval-Augmented Generation (RAG) pipelines using Python and large language models (LLaMA 3.3-70B). Practical experience across data preprocessing, feature engineering, prompt engineering, and API-based model deployment, backed by a strong foundation in Data Structures, Algorithms, OOP, and DBMS. Oracle Certified Generative AI Professional. Seeking an AI/ML Engineer Internship to apply practical machine learning and software engineering skills to real-world R&D projects.

EDUCATION

B.E., Computer Science and Engineering — Kalpataru Institute of Technology (VTU)

CGPA: 8.77 / 10.0 (87.7%) | Graduating 2027

Diploma in Engineering — Sree Siddrameshwara Polytechnic

CGPA: 9.38 / 10.0

TECHNICAL SKILLS

Programming Languages: Python, HTML/CSS

Machine Learning & AI: Machine Learning Fundamentals, Generative AI, Retrieval-Augmented Generation (RAG), Prompt Engineering, LLM Integration (LLaMA 3.3-70B, Groq), LangGraph, NumPy, Pandas, Scikit-learn

Data & Backend: MongoDB, Node.js, Express.js, REST API Design & Integration, Data Cleaning & Analysis

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, Computer Networks, DBMS

Tools & Platforms: Git, GitHub, Netlify, Render, Google Maps API

PROJECTS

PropAI — AI-Powered Real Estate Intelligence Platform

Role: Team Lead & AI/Full-Stack Developer

Tools Used: Python, React.js, Node.js, MongoDB, LangGraph, LLaMA 3.3-70B, RAG, Git

Outcome: Built a predictive mortgage-estimation model and personalized property recommendation engine, with a RAG pipeline (LLaMA 3.3-70B via LangGraph) enabling intelligent property search and investment analysis.

Recipe AI — Generative AI Culinary Recommendation Engine

Role: AI Developer

Tools Used: Python, LLaMA 3.3-70B, Groq Inference, Prompt Engineering, Render

Outcome: Built an end-to-end generative AI recipe engine converting available ingredients into personalized recipes with nutrition analytics, 12+ dietary filters, and automated prep/cook-time estimation; deployed live on Render.

AI-Powered E-commerce Platform

Role: Team Lead & Full-Stack Developer

Tools Used: React.js, Node.js, Express.js, MongoDB, Generative AI, Git

Outcome: Developed an ML-driven product recommendation engine, a Generative AI-based product description tool, and an intelligent customer support chatbot integrated through backend APIs.

IntelliTrip — AI-Powered Travel Companion

Role: Full Stack Developer

Tools Used: React.js, Node.js, Express.js, Google Maps API, Netlify

Outcome: Developed an AI-powered travel planner with personalized recommendations, itinerary management, and a responsive user interface.

INTERNSHIP EXPERIENCE

Data Science & Machine Learning Intern — upSkill Campus

- Collaborated with UniConverge Technologies to solve real-world data challenges using Python and MongoDB, applying data cleaning and analysis workflows.

Machine Learning Intern — IncodeVision

- Worked on real-world AI/ML projects, applying practical machine learning techniques and workflows.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional — Oracle University
- Introduction to Modern AI — Cisco Networking Academy
- Introduction to Data Science — Cisco Networking Academy
- Apply AI: Analyze Customer Reviews — Cisco Networking Academy
- Python Essentials 1 & 2 — Cisco Networking Academy
- Getting Started with Artificial Intelligence — IBM Skills Build
